

Minority Cell

The college being a minority institution managed by the Syro-Malabar Catholic Diocese of Mananthavady, has established a minority cell to empower the students belonging to minority communities in the college. In compliance with the vision of the college, the minority cell aims to bring the communities at par with the rest of the society by providing assistance to improve their curricular and co-curricular activities.

The minority cell of the college monitors the admission of the students to the community quota and helps them to avail financial assistance from various government and non-government agencies. The cell assists the students in their academic growth by encouraging them to utilize the facilities of various student support activities like counselling, remedial teaching, and career guidance programmes.
